

AUSTRALIAN RESILIENCE CENTRE

East Coast Hill Country: Resilience in Practice

PLEASE JOIN US FOR A STIMULATING AND CHALLENGING ONE-DAY WORKSHOP ON PUTTING THE SCIENCE OF RESILIENCE THINKING INTO PRACTICE.

The workshop will cover why resilience thinking has emerged as a powerful tool for managing complex social-ecological systems and how a resilience-based approach can build the capacity of communities and organisations facing change.

Participants will study key resilience concepts and learn how to apply these in practice. The workshop will combine short overview presentations and practical activities with small group discussion and reflection sessions.

Australian Resilience Centre

We put the science of resilience thinking into practice.

We bring together resilience, adaptation and transformation principles with social and organisational learning to offer a new paradigm for tackling complex real world problems.

We consult, train, research and engage to build the capacity of people, communities and organisations navigating change.

www.ausresilience.com.au

"Paul Ryan is an engaging communicator, with an impressive ability to convey challenging ideas about systemic change to any audience."

Senior Research Fellow, Charles Sturt University

"I've had the pleasure of attending two of the Centre's training courses in resilience thinking. Both times I've been so impressed by Paul's ability to translate complex concepts so that they make sense for his audience, wherever they are at."

PhD Student, Stockholm University, Sweden

When:

9am—4pm
Monday 10 October 2016

Venue:

Napier Sailing Club
Lat/Long: -39.485687 / 176.892407
63 West Quay
Ahuriri, Napier
New Zealand

Cost:

\$420 per participant. Lunch, morning and afternoon teas are included.

Workshop presenter:

Paul Ryan, Director of the Australian Resilience Centre, will lead the workshop. Paul has facilitated over 400 days of resilience-based workshops throughout Australia and overseas. Paul advises federal, state and regional agencies and research institutions on building resilience, transformation and adaptation principles into planning, implementation and assessment processes.
